

IN THE CLAIMS

Please amend the claims as indicated below.

1. (Currently Amended) A method performed by a wireless communication device, comprising steps of:

receiving an incoming call from a first telephone number;

incrementing a variable indicating a number of calls received from said first telephone number;

prompting a user to save said first telephone number along with a corresponding voice tag when said variable is equal to or greater than a threshold number;

prompting the user for a new voice tag if a recording quality of the corresponding voice tag is not high; and

storing said first telephone number and an acceptable recording quality voice tag in an address book.

2. (Currently Amended) The method of claim 1 wherein said prompting step comprises steps comprise audibly prompting said user.

3. (Currently Amended) The method of claim 1 wherein said prompting step comprises steps comprise presenting text on an LCD display.

4. (Original) The method of claim 1 wherein said threshold number is set by a manufacturer.

5. (Original) The method of claim 1 wherein said threshold number is set by said user.

6. (Cancelled)

7. (Cancelled)

8. (Cancelled)

9. (Currently Amended) The method of claim [[6]] 1 further comprising a step of saving said voice tag corresponding to said first telephone number in a voice tag file.

10. (Cancelled)

11. (Currently Amended) The method of claim [[10]] 1 further comprising a step of comparing said corresponding voice tag to a quality parameter in order to determine whether the recording quality of the corresponding voice tag is not high.

12. (Currently Amended) The method of claim 11 further comprising a step of making a request to said user to record said new voice tag in a different geographical location.

13. (Original) The method of claim 12 wherein said step of making said request comprises making said request audibly.

14. (Original) The method of claim 12 wherein said making step comprises presenting text on an LCD display.

15. (Currently Amended) The method of claim [[10]] 11 further comprising a step of saving said voice tag corresponding to said first telephone number in a voice tag file.

16. (Cancelled)

17. (Cancelled)

18. (Currently Amended) An apparatus in a wireless communication device comprising:

a receiver configured to receive an incoming call from a first telephone number;

a CPU configured to increment a variable indicating a number of calls received from said first telephone number;

a user interface adapter configured to prompt a user to save said first telephone number along with a corresponding voice tag when said variable is greater than a threshold number and to prompt the user for a new voice tag if a recording quality of the corresponding voice tag is not high; and

a memory module configured to store said first telephone number and an acceptable recording quality voice tag in an address book.

19. (Original) The apparatus of claim 18 wherein said user interface adapter causes a speaker to prompt said user to save said first telephone number.

20. (Original) The apparatus of claim 18 wherein said user interface adapter causes an LCD display to prompt said user to save said first telephone number.

21. (Original) The apparatus of claim 18 wherein said threshold number is set by a manufacturer.

22. (Original) The apparatus of claim 18 wherein said threshold number is set by said user.

23. (Cancelled)

24. (Cancelled)

25. (Cancelled)

26. (Cancelled)

27. (Currently Amended) The apparatus of claim [[26]] 18 wherein said CPU is further configured to compare said corresponding voice tag to a quality parameter in order to determine whether the recording quality of the corresponding voice tag is not high.

28. (Currently Amended) The apparatus of claim 27 wherein said user interface adapter is further configured to prompt said user to record said voice tag in a new geographical location.

29. (Currently Amended) A method performed by a wireless communication device, comprising steps of:

receiving a voice tag corresponding to a first telephone number, said voice tag having a recording quality;

comparing said recording quality to a quality parameter;

prompting a user to re-record said voice tag when said recording quality does not satisfy said quality parameter;

saving said voice tag.

30. (Original) The method of claim 29 wherein said prompting step comprises prompting said user audibly.

31. (Original) The method of claim 29 wherein said prompting step comprises presenting text on said LCD display.

32. (Original) The method of claim 29 further comprising a step of saving said first telephone number before said step of receiving.

33. (Original) The method of claim 29 further comprising a step of asking said user to utilize a voice dialing feature.

34. (Original) The method of claim 33 wherein said asking step comprises audibly asking said user.

35. (Original) The method of claim 33 wherein said asking step comprises presenting text on an LCD display.
